UNJSPF – Simplified Governance Structure

Fund Objective

3

- 3.5% annualized real rate of return over the long-term
- Calculated by deducting inflation from the nominal return for a given year
 - Example: 6.5% nominal return – 3% inflation assumption = 3.5% real return
 - Currently, inflation, as measured by US CPI, is relatively low
- 3.5% may not be achieved each and every year
- 3.5% real return continues to be reasonable over time

Key Criteria

4

- ❖ Safety
- ❖ Profitability
- ❖ Liquidity
- ❖ Convertibility

Total Fund Nominal Returns

7

For the 3 month period ending 31 March 2015

Source: Preliminary data from Independent MRK Northern Trust. Numbers reported as of 16 April 2015.

Fund update as of 2 June 2015

8

- \$54,347,599,890 Market Value of Assets
- 3.02% nominal return

Relatively Conservative

- We do not need to take as many risks as some other pension funds
- Our 3.5% real return objective is lower than the return target of many other pension plans
- Our funded status is strong, thanks to consistent success in meeting the 3.5% goal over the past 50 years

Asset Allocation

10

- An Asset Liability Modeling (ALM) study is currently under way to determine updated target weightings for each asset class
- Current Strategic Asset Allocation policy:
 - ▣ 60% Global Equities
 - ▣ 31% Fixed Income
 - ▣ 6% Real Assets (mostly Real Estate)
 - ▣ 3% Cash & Equivalents

Hedge Funds

12

- A recent article in CNBC said that we plan to increase our exposure to this category, and this is not correct
- Currently, 3% of UNJSPF assets are invested in alternative investments
 - ▣ 2% in high quality private equity funds
 - ▣ 1% or \$500 million in the Bridgewater All Weather fund (not universally identified as a hedge fund)

Improving Communications
